Mini Project

OPEN RESPONSE ASSESSMENT

Status

You have completed this assignment. Review your grade and your assessment details.

▸ | Your Response due Jan 1, 2029 01:00 CET (in 10 years, 4 months) ✓ COMPLETE

▸ | Assess Peers due Jan 1, 2029 01:00 CET (in 10 years, 4 months) ✓ 3 COMPLETED

▾ Your Grade: 15 out of 15

The question for this section

Per the project description in the readings from earlier this week, please submit the pdf of your work for peer assessment. This should include the pdf of your slides following our template and, if possible, the pdf of your notebook. If you are unable to attach the notebook for either size restrictions or privacy issues, please state this in your slides. Remember that the upload size is limited.

To submit, you need to put a text response below. Please just say what is included in the attached pdf.

Your Response

The mini project includes a primary analysis of the IMDB movie list. It deals with the question whether or not popular movies have characteristic titles.

I would be greatly honoured if you could take a look and let me know where the analysis, the data munging or selection or the initial findings could be improved. Thank you.

Your Upload

The 10 slide presentation of the movie title analysis

Assessments of Your Response

PEER 1 - WELL

PEER 2 - WELL

▼ Research Question

2 / 2 POINTS

- PEER MEDIAN GRADE - 2 POINTS

Appropriate ⓘ

PEER 1 - APPROPRIATE

I would say initially it felt like an appropriate research question but after reading through the slides it seems that this was too broad of question. Because I can see why the author considered this question in the beginning I'm going with full points.

PEER 2 - APPROPRIATE

▼ Presentation of Findings Overall

3 / 3 POINTS

- PEER MEDIAN GRADE - 3 POINTS

Very Well ⓘ

PEER 1 - VERY WELL

PEER 2 - VERY WELL

▼ Finding Slide(s) Visualizations

3 / 3 POINTS

- PEER MEDIAN GRADE - 3 POINTS

Excellent ⓘ

PEER 1 - EXCELLENT

PEER 2 - EXCELLENT

Some of the graphs were a little crowded, but I guess that was what you intended at times. Looking forward to the follow up data analysis work.

PEER 1 - GOOD

PEER 2 - EXCELLENT

▼ Additional comments on your response

• PEER 1

The author is truly showcasing his skills as an actual author and the analysis plays out more like a story which makes it enjoyable to read through. He articulates extremely well and it is easy to follow along. The constructive criticism is that it plays out more like a story, than a data analysis presentation. The side comments could probably be left off of the presentation (e.g. "Oh no!", "But wait!", etc) and still get the author's point and conclusion across. Overall, the author showed an appropriate question especially in regards to his own personal experience and also presented multiple data visualizations which was well within the scope of the course in my opinion.

PEER 2

I liked the motivation and research questions the most.
